M2: Practical –3

Roll No.:T050	Name: Aashu Yadav
Class:TYIT	Batch:1
Date of Assignment:2-9-2026	Date/Time of Submission:2-9-2026

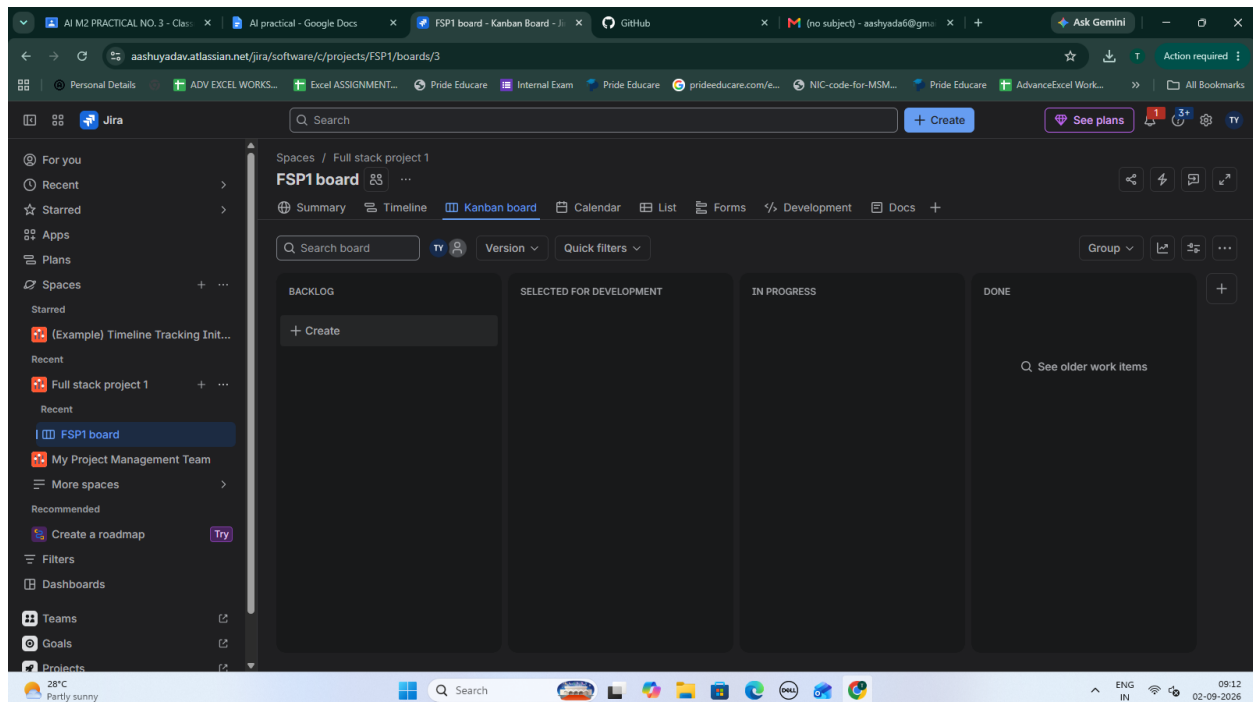

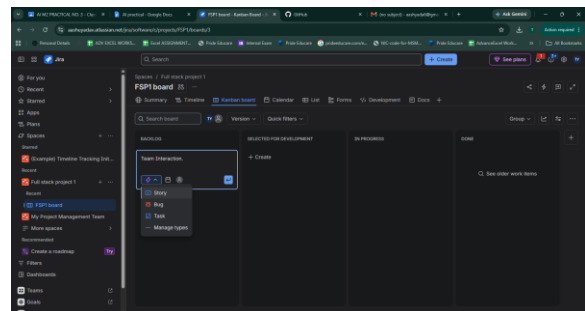

Aim:-

3A – Create and Configure Issue Types

Step 1:-Open the FSP board of the Full Stack Project.

Step 2:-You will see the Kanban board with these columns:

- **Backlog**
- **Selected for Development**
- **In Progress**
- **Done**

Step 3:-In the Backlog column, click Create.

Step 4:-A new issue card will appear with the field “What needs to be done?”.

Step 5:-Enter the name of your work item.

Step 6:-Click the Issue Type drop-down/icon on the issue card.

Step 7:-You will see issue types such as:

- **Epic**
- **Task**

- **Bug**

Step 8:-For a normal activity, select **Task**.

Step 9:-Enter a suitable task name.

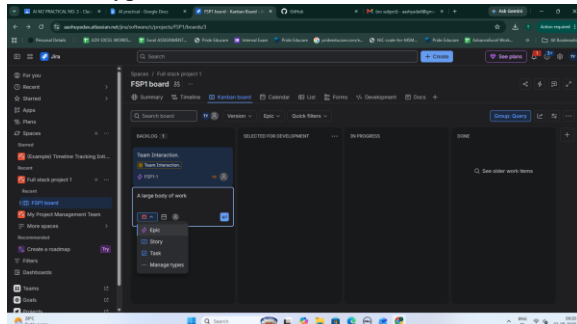

Example: **Team Interaction**.

Step 10:-Click **Create / Enter** to create the issue.

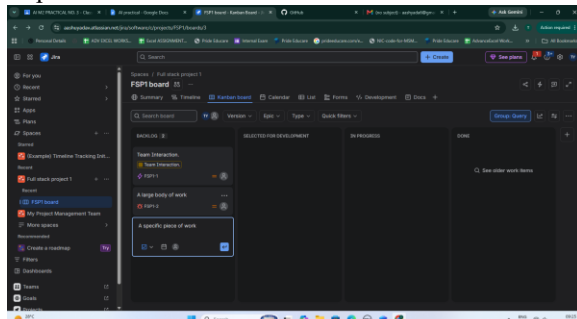

Step 11:-The task will appear as a card in the **Epic** column.

Step 12 – Create a Epic

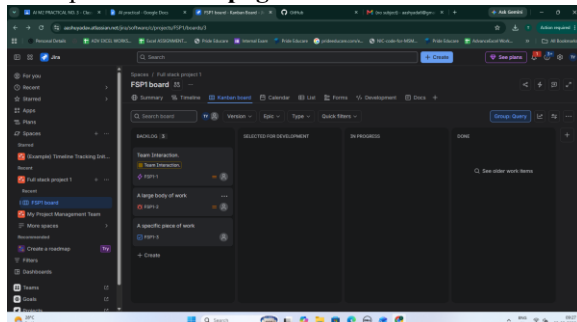

Create another A large body of work select **Epic** as the issue type.

step13:-Task

Example: **Fix Homepage.**

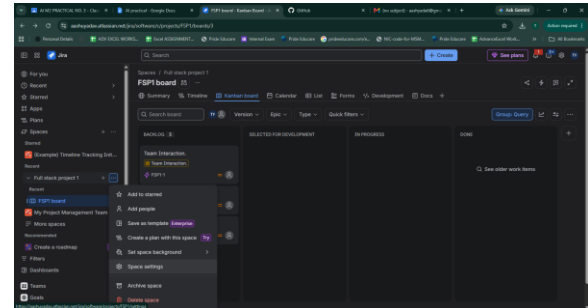

3B – Create Components and Versions

Theory

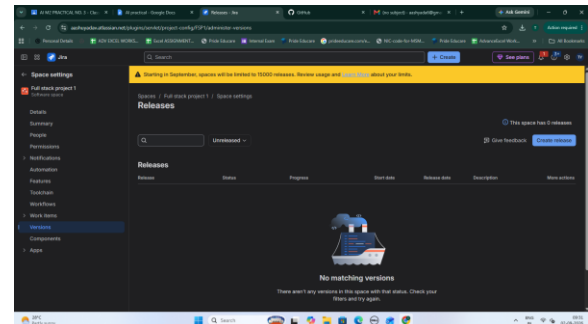

Jira uses different issue types to represent different kinds of work in a project. Issue types help the team organize and identify the work clearly. In this practical, we create Task, Bug and Epic issue types. The Kanban board provides a visual representation of the work and its current stage.

Step 1:-Go to Space Settings.

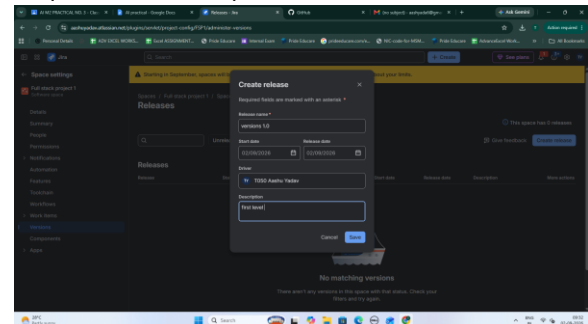

Step 2 – Create Release

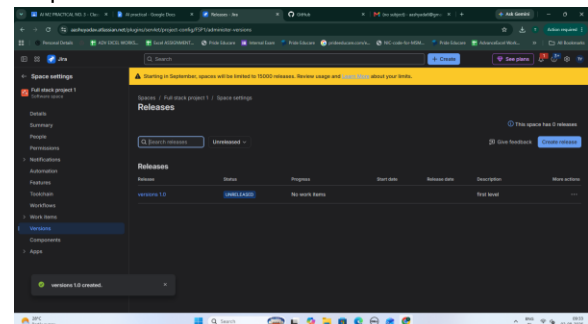

Click Create Release.

Step 3:-Enter the required release details.

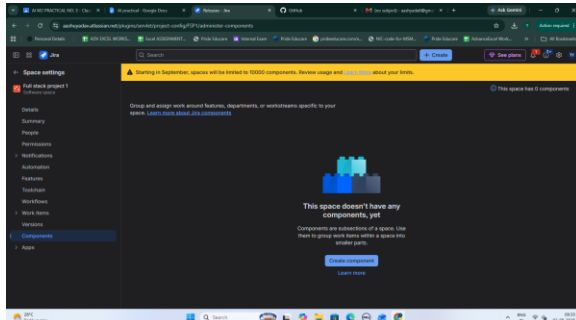

Step 4:-Click Save.

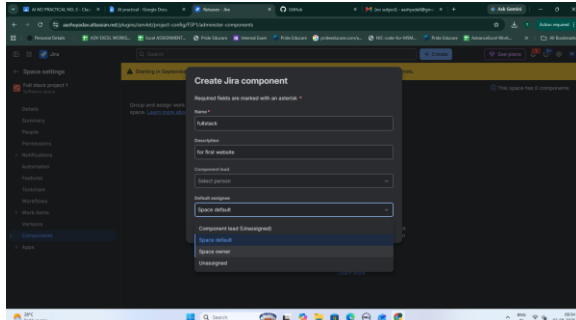

Step 5:-The Version List will appear.

Step 6 – Create Component

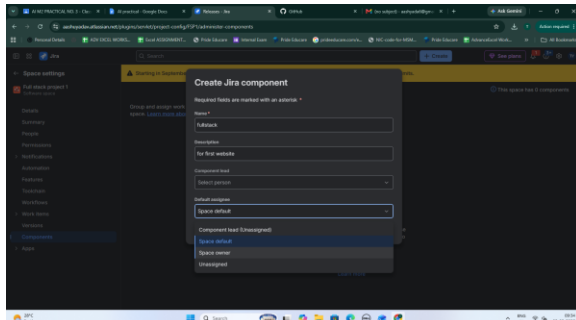

Click Components.

Step 7:-Click Create Component.

Step 8:-Enter the required component details.

Step 9:-Click Save.

Step 10:-The Component List will appear.
